

REMARKS

For the convenience of the Examiner set forth below is a recapitulation of the current status of the Claims in the present Application.

CLAIMS	STATUS	DEPENDENCY
1	Canceled	—
2	Canceled	—
3	Canceled	—
4	Canceled	—
5	Currently amended	Independent
6	Canceled	—
7	Canceled	—
8	Canceled	—
9	Canceled	—
10	Currently amended	5
11	Currently amended	5
12	original	10

Comments of Examiner James G. SMITH have been reviewed carefully along with pertinent sections of the Patent Act, Patent Rules, Manual of Patent Examining Procedures, legal treatises and relevant decisional law. Allowances of the Application, as amended, is solicited earnestly.

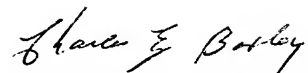

Claims 1 and 5 have been combined. Claims 10 and 11 now each depends from Claim 5. Claim 12 depends from Claim 10. In the invention of the present Application direction switch 40 rotates and a spring-biased detent 151 provides an axis which prevents the direction switch 40 from disengaging. This useful, new and non-obvious feature is neither anticipated nor rendered obvious by any of the cited references or by any fair combination thereof. Note that the '594 Patent uses these chambers whereas the invention of the present Application uses two.

In view of the foregoing amendments, submissions and explanations, it is believed that Claims 5 and 10-12, as amended, are in condition for allowance. An early Notice of Allowance on the Application will be appreciated.

The Commissioner is authorized to credit any overpayments or debit any deficiency to Deposit Account 02-1435.

Courtesy, cooperation and skill of Examiner James G. SMITH are appreciated and acknowledged.

Respectfully,

CHARLES E. BAXLEY
